DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure, which is not enabling. The amount of polymerizable liquid crystal monomer is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). See page 5, line 7, page 8, lines 23-24 and page 12, line 8 in the present specification. The present specification states the present invention is mainly depending on the amount of monomer added.
2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references do not disclose the present smectic liquid crystal device and process for producing uniform orientation of a smectic liquid crystal. The process comprises the steps of inducing an isotropic phase-nematic phase-smectic phase as a phase sequence of mixture obtained by adding a photopolymerizable monomer liquid crystal exhibiting nematic phase to a smectic liquid crystal and irradiating the mixture with UV rays so that the monomer is photopolymerized into a polymer to thereby form a smectic liquid crystal medium with uniform orientation structure.
